REMOVABLE INSULATION BLANKETS

We manufacture custom-fitted, removable and reusable thermal insulation covers for commercial and industrial mechanical piping and equipment. Removable pads reduce energy costs and maintain process temperatures while protecting personnel and equipment from hazards. Easy to install and remove.

Product applications:

- Valves
- Flanges
- Strainers
- Pumps
- Flow meters
- Heat exchangers
- Covers with electrical heating components

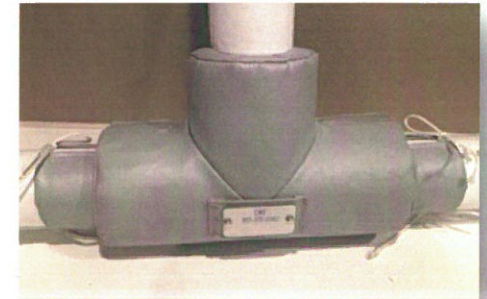

Benefits

- Energy conservation
- Personal protection
- Freeze protection
- Fire protection
- Material/labor savings
- Increased workplace comfort
- Reduced operation cycles of equipment
- Reduced maintenance cost

With our custom design process we can create removable insulation covers to satisfy virtually any application, and with the highest quality materials we will ensure excellent performance and long life. All covers include an aluminum tag engraved per customer spec (i.e. Valve #) in case replacement is required.

Contact us with any questions or request for quote.

Typical Construction Materials

	0°F to 350°F	351°F to 450°F
Outer	17 oz. silicone impregnated Fiberglass fabric	
Inner		17 oz. silicone impregnated Fiberglass fabric
Insulation	1" alpha temp-mat (e- glass fibers)	2" alpha temp-mat (e- glass fibers)
Fastening	1.5" Nylon Velcro 1.5" straps and ss D-rings 1/8" Teflon impregnated fiberglass rope 12 ga quilt pins	
Thread	PTFE/Teflon impregnated fiberglass thread
